"Joan has written an uplifting memoir about overcoming personal tragedy. This story of faith and positivity details her path as she struggled to make her way while supporting a young daughter and building a life of public service and compassion for others. The Girl from Madison County is a page-turning narrative about a truly amazing woman."

Mary Coley | Author

"What sets The Girl from Madison County apart is how Joan details her transition from a victim of her circumstances to someone determined to make a difference in the lives of others. As she turns her pain into power, she gives hope to all women stuck in the cycle of trauma and its powerful aftermath. There is hope. You can overcome."
